

EMEP(Extra-Mural Education Project)

£7660.00

Aims to develop an extra-mural sector for poor historically disadvantaged schools in South Africa's townships so they can grow into community hubs. They need funds to cover the vital activities of producing 3 year development plans for the demonstration schools.

Owing to the funds from TFN, EMEP were able to respond to a new development opportunity by bringing 12 more poor schools, not just the three agreed to, into their planning processes. As a result, thousands more poor children are benefiting by a growing extra-mural service in and around their schools where they would be most vulnerable.
