

## **Jaipur Limb Campaign**

**£5849.00**

Improves the lives of disabled people in poor countries especially those who have lost limbs through war, accident or disease. The funds raised today will be used to sponsor a disabled Angolan on a years training course in orthotics and will cover his course fees, English lessons, course materials and insurance.

TFN funded the Jaipur Limb Campaign to sponsor Joao on a one-year training course in Orthotics at JLC partner Mobility India's training centre in Bangalore. Since then the Jaipur Limb Campaign has sponsored 6 trainees on training courses in prosthetics, orthotics and community therapy at the Mobility India's training centre this year. With their skills, JLC will be able to help LARDEF, an Angolan organisation of disabled people, to set up a rehabilitation service for disabled people, to run alongside the existing income generating projects and other programmes for displaced and disabled people.
