

## **Prison Radio**

**£5269.00**

Will provide opportunities for active participation in and production of a radio station for prisoners at Wandsworth Prison in South London. Funds are sought to establish a second production studio which will increase participation and could be instrumental in securing funding for a nation-wide roll out of other stations in prisons.

The TFN grant enabled Prison Radio to equip a second studio area, creating the Broadcasting Unit, and are now able to broadcast quality speech-based programmes to the prison community every day, as well as produce CDs that support different prison-based activities.

The project has been nominated as an example of Best Practice in the delivery of prison education.
